Access Beam Angle and CCT Selections at Your Fingertips

Powered by SelectBeam and SelectKelvin technologies, the AdjustaPAR series of lamps allow for two selectable beam angles and five selectable color temperatures from only one product with just a flip of switch. Forget about time-consuming specification and navigating through multiple SKUs for your specific selection. AdjustaPAR brings all-in-one solution at your fingertips.

2 Selectable Beam Angles

The AdjustaPAR lamps are designed with integrated beam angle switch. You can conveniently choose between narrow flood 25° and flood 40°, the two most commonly used beam angles for PAR lamps in the field. This industry leading integrated beam angle select solution provides effortless control over the spread of lighting at your fingertips.

5 Selectable Color Temperatures

The integrated CCT select switch allows for easy selection among five color temperatures in 2700K, 3000K, 3500K, 4000K and 5000K, for customized ambiances in any space. Whether it is to create a warm and cozy atmosphere, or bright and vibrant one, simply adjust to the right CCT without the need of changing the lamp for achieving your desired lighting effect.

Supreme Performance and Optimized Stock Management

Convenience and simplicity is not achieved by sacrificing lighting performance and quality. AdjustaPAR lamps are high CRI 90 rated for great color accuracy, suitable for totally enclosed fixtures, smooth dimming on most 120V forward and reverse phase dimmers, and Title 20 certified for residential applications in California.

Available in three sizes of PAR30, PAR30SN, and PAR38, each adjustable to five color temperatures and two beam angles, AdjustaPAR lamps series realizes 90% stock management savings for distributors, enables ten field customization possibilities for installers, and provides end-users with a future-proof lighting solution that can upgrade and evolve with the changing needs of your space.
