Leading Efficacy

More Powerful Light with Higher Efficacy

Working directly on 120-277V line voltage with 2,500 lumen powerful light output, this lamp is an ideal replacement for 32W-42W compact fluorescent lamps. Featured with exceptional high efficacy up to 147 LPW, it provides maximized energy saving solutions for most general lighting retrofit projects, with low operational cost and quick ROI.

Softer Light with 360° Distribution

Omnidirectional Light Distribution with Frosted Lens

Engineered with 360° omni-directional light distribution and frosted lens, the lamp can be installed either vertically or horizontally, creating more uniformed and softer lighting effect equivalent to fluorescent lamps.
