

Greater Selection Better FIT

SELECTFIT G2

GREENCREATIVE

The Same Quality, Durability and Simplicity

SELECTFIT features a die cast heat sink maximizing passive thermal management for high max ambient temperatures. The operating range is -40°F to 113°F (-40°C to 45°C) on all models and IC rating on most models. All models feature Wet location and certified air-tight ratings for maximum adaptability. Proprietary spring action clips enable direct installation in 1/2" to 2" ceiling thicknesses and field accessibility below the ceiling for easy install and service.

Soothing Pure Light

A smooth and uniform lighting distribution, offered with an LED binning within 3 SDCM maximum, in minimum 90 CRI, with calculated L70 of 100,000hrs+ for impeccable uniformity and incredible color rendering over the life of the SELECTFIT fixture.

In Multiple Sizes

Greater Flexibility

SELECTFIT G2 from GREEN CREATIVE brings greater flexibility to your retrofit project or new construction application while maintaining the excellent performance and quality. With a total of 180 field installable SKUs packed in only 6 product SKUs, this new and improved lighting family still offers integrated CCT and lumen output selections. For additional flexibility, the SELECTFIT G2 series now features DualDim technology and a full set of accessories.

More Integrated CCT and Lumen Options

Select Drive

Get the right amount of light with SELECTFIT still powered by SelectDrive technology. Choose from Low, Medium or High light outputs. With just the flip of switch, ensure that every space has just the right amount of light from 600lm to 5000lm.

Select Kelvin

Utilizing our SelectKelvin technology, select the CCT before, during, or after installation with just the flip of a switch. Choose from 2700/3000/3500/4000/5000K CCTs to customize any application and set the right atmosphere for your space.

DualDim

Ready For Any Dimming Protocol

All SELECTFIT products are suitable for 120-277V input and feature our DualDim technology allowing the luminaire to be dimmed with either 120V TRIAC/ELV or 0-10V controls. Taking the guesswork out of auditing an existing space and providing optimal flexibility while minimizing un-expected installation issues in the field. Whether your project is residential, commercial, mixed-use, new construction or remodel, SELECTFIT will FIT.

A Solution For Any Ceiling Height

With SELECTFIT you can get the right amount of light for any project. Ranging from 600lm to 4,500lm, SELECTFIT will fill any existing space. The 6" and 8" are now offered in high output versions perfectly suited for high ceilings, such as auditorium, atrium, lobby, mall, theater, cinema, hallway, train station, airport and so on. The long lifetime and superior heat dissipation, on IC or non-IC rating models, will ensure you a maintenance free installation with a fast ROI and exceptionally long lifetime.

Specify Further With Additional Accessories

SELECTFIT also offers tool-less field-installable accessories to give designers more options. The clear trim insert, wall washer, and medium Fresnel optic allow you to redesign the lighting layout according to the demands of the space. Whether you need to alter a beam angle, highlight artwork on a wall, match existing layout or optimize distribution across your application, the SELECTFIT has an attachment that can help you meet your goals.

Office spaces, mixed-used spaces, condominium, agencies...

Lobby, auditorium, theater, atrium, schools, university...

Shops, shopping malls, cinemas, airport, train stations...

Hotel, casinos, restaurant, multi-family, hospitals, clinics...
