

GREENCREATIVE

**Remarkably efficient.
Greatly versatile.**

Designed for efficiency in energy consumption and versatility in retrofitting, the VERSA filament lamp series is the optimal choice for conveniently upgrading most existing incandescent lamp applications.

Versatility in Retrofitting

VERSA filament lamps are designed for working under very wide fixture operation temperature range of -25°C to 45°C, suitable for use even in tight and totally enclosed fixtures like jelly jars, wall lanterns and pendants.

Exceptional Efficacy

With exceptional efficacy up to 120 LPW, VERSA filament lamps deliver excellent energy saving solutions and generate quicker ROI for your lighting projects.

Full Glass Construction

In classic vintage style and full glass construction, VERSA filament lamps create welcoming and cozy atmosphere delivering light in wider beam angle, great for all indoor and outdoor general lighting applications, including wet location areas.

Brilliant Performance

VERSA filament lamps are available in various shapes and finishes, delivering high CRI 90 color rendering and smooth dimming lighting performance. ENERGY STAR certified and California Title 20 compliant, these lamps are your best choices for all traditional light upgrading jobs.
